FilesAnywhere since 1999

# Cut Costs. Increase ROI.
## Secure Your Files.

2026

Modern cloud file management for growing and regulated organizations

## Reduce IT costs. Modernize file management.

Replace infrastructure-heavy file servers with secure cloud or hybrid file management. Reduce hardware, backup, maintenance, and administration overhead while helping teams work faster.

### Business impact

**LOWER COSTS**
Avoid server refreshes, storage expansion, backup hardware, and maintenance.

**LESS ADMIN**
Reduce time spent managing file servers, backups, and user access.

**FASTER WORK**
Provide secure access and sharing from supported devices.

**STRONGER CONTROL**
Use permissions, audit trails, MFA, and version control.

### Cloud economics at a glance

**84%**
Managing cloud spend is a top challenge.

**59%**
Organizations have dedicated FinOps teams.

**55%+**
Enterprise workloads run in public cloud.

**$4.4M**
Average global cost of a data breach.

**$1.9M**
Average AI and security automation savings.

### The FilesAnywhere advantage

**SCALE WITHOUT HARDWARE**
Add users and storage without expanding local infrastructure.

**COLLABORATE SECURELY**
Share business files inside and outside the organization.

**IMPROVE VISIBILITY**
Use activity records and controls to support governance.

**THE OPPORTUNITY** **Lower total cost while strengthening productivity, availability, and security.**

WHY FILESANYWHERE

# One Platform. Faster Value.

Consolidate secure storage, sharing, document intelligence, governance, and workflow capabilities in one scalable enterprise platform.

### Secure cloud storage

Enterprise storage with controlled access.

### AI-powered search

Find and understand documents faster.

### Cloud or hybrid

Support Azure and hybrid deployment needs.

### Secure sharing

Exchange files internally and externally.

### Audit trails

Improve visibility into content activity.

### Workflow automation

Reduce repetitive document processes.

## Typical customer ROI opportunities

- Up to 40-60% lower infrastructure costs
- Eliminate expensive server replacement cycles
- Reduce storage and access administration
- Scale without additional hardware investments
- Improve productivity through faster document access
- Minimize downtime with cloud availability
- Lower cybersecurity and compliance risk
- Integrate with Microsoft 365 and enterprise workflows

## Build a credible business case

1. Baseline current costs: servers, storage, backup, support, administration, and downtime.
2. Define target scope: users, storage, sharing, integrations, retention, and deployment.
3. Compare migration, subscription, support, security, and operating costs.
4. Measure infrastructure avoided, administration reduced, access speed, and adoption.
