FilesAnywhere since 1999

Secure. Compliant. Trusted.
Since 1999.

2026

Enterprise cloud storage and collaboration built around security

Trust, privacy, and compliance mean total assurance

FilesAnywhere helps financial services, healthcare, government, and other regulated organizations protect information with layered safeguards, dependable availability, and administrative control.

SOC 2 data center | **HIPAA assessment** | **FINRA** | **GLBA** | **SOX** | **GDPR** | **PCI DSS** | **ISO 27002**

Defense-in-depth protection

AES — Advanced Encryption

Protect data during transfer and supported backup workflows.

- TLS encryption for secure transfers
- AES-256 local encryption before CoolBackup upload
- Password-protected and expiring external links

DC — Infrastructure Security

Resilient facilities and monitored services.

- SOC 2-certified data-center environment
- Tier-1 multi-carrier backbone and N+1 storage
- Redundant power, HVAC, fire suppression, and connectivity

2026 core safeguards

- Role-based access controls and user provisioning
- Administrative auditing, reporting, and usage metrics
- Custom password lifecycle and strength requirements
- Industry-standard firewall and intrusion detection
- Regular external intrusion testing
- 24/7/365 monitoring of critical services

“We take your privacy, and the safety of your data, very seriously.”

COMPLIANCE BUILT IN

Security Controls That Support Your Program

FilesAnywhere provides access, reporting, governance, backup, and recovery capabilities that can support customer compliance programs. Applicability depends on configuration, contracts, policies, processes, and regulatory scope.

GRC

Compliance Programs

Controls can support customer obligations associated with:

- HIPAA and HITECH healthcare workflows
- FINRA, GLBA, and SOX governance
- GDPR privacy and accountability
- PCI DSS scoped environments and ISO/IEC 27002 guidance

LOG

Compliance Features

Configuration and availability vary by plan.

- Role-based access and provisioning
- Administrative auditing and reporting
- Usage metrics and automated notifications
- Secure sharing with passwords and expiration

Reliability, backup, and recovery

DATA

Data Durability

Layered backup and restoration capabilities.

- Daily snapshots for every account
- Point-in-time backups stored for 60 days
- Encrypted CoolBackup workflows and data restore

DR

Operational Resilience

Infrastructure designed for continuity.

- N+1 storage redundancy
- Redundant power, HVAC, fire suppression, and network
- Continuous monitoring of critical services

Why customers choose FilesAnywhere

1. **Enterprise-grade safeguards**
2. **Compliance-supportir controls**
3. **Predictable administration**
4. **Long-term service experience**
5. **Responsive customer support**

Security isn’t a feature. It’s our foundation.

Secure. Compliant. Trusted. Since 1999.
